

Omkar Deshmukh

Team Lead | Full-Stack (MERN) Developer | Industry Coordinator
Pune, India | +91 9764781298 | omkardeshmukh394@gmail.com | [Github](#) | [linkedin](#)

PROFESSIONAL SUMMARY

Computer Engineering student who combines technical delivery with team leadership. Currently Team Lead, Industry Coordinator and Full Stack Developer at the DYPCOE&I Incubation Center, where I lead development work, coordinate with industry contacts and founders, and manage SEO for the online presence. Experienced in building and deploying MERN applications, REST APIs and LLM-powered features across four internships and roles. Known for turning requirements into working software, keeping quality high and keeping stakeholders aligned.

CORE SKILLS

Leadership & Coordination: Team Leadership, Task Planning & Delegation, Code Reviews, Stakeholder & Industry Coordination, Requirement Gathering, Mentoring

Languages: JavaScript, Python, SQL

Full Stack: React.js, Node.js, Express.js, MongoDB, REST APIs, MySQL Prisma

SEO & Web: On-Page SEO, Keyword Research, Site Performance, Web Content Optimization

AI & Tools: LLM Integration, Gemini API, Claude API, Prompt Engineering, Git, GitHub, Vercel, Netlify, Render

EXPERIENCE

Team Lead, Full Stack Developer, DYPCOE&I Incubation Center *Feb 2026 – Present*

- Lead the development team on incubation-center software, including the OBE Evaluation System, by planning work, assigning tasks and reviewing output for quality.
- Act as the industry coordinator, working with industry contacts, mentors and founders to turn requirements into deployed, working software.
- Own frontend and backend development of MERN stack applications used by faculty, HODs, startups and the Businesses.
- Handle SEO for the web presence to improve search visibility and discoverability.

Machine Learning Intern, FlyRank AI *Jul 2026 – Present*

- Contribute to applied ML and AI initiatives within the engineering team, working on model integration and AI-driven product features.

Web Developer Intern, Unified Mentor *Jun 2025 – Sep 2025*

- Developed responsive web applications with the MERN stack and built reusable React components and REST API integrations that sped up later features.

Software Development Intern, Sagar Defence Engineering, Pune *Jun 2024 – Jul 2024*

- Contributed to internal software development tasks in a 1.5-month paid internship using version-controlled team workflows.

PROJECTS

OBE Evaluation System (Outcome Based Education) *MERN Stack*

- Building the software for college faculty, HODs and the principal to perform CO-PO mapping and attainment calculation, a requirement for NBA and NAAC accreditation.

Shiksha Netra – School Management System (SaaS) *MERN Stack*

- Developed a multi-tenant platform for student records, teacher data and fee management, with automated Leaving Certificate and Bonafide letters. Live: [shikshanetra.netlify.app](#)

Fitpulse – Gym Management System (SaaS) *MERN Stack, Claude API*

- Built memberships, a member portal and trainer-assigned workout and diet plans using a reusable template pattern and a nutrition calculator. Live: [fitpulse-zeta-five.vercel.app](#)

MyFin AI – AI Finance Controller (Razorpay Buildathon) *MERN Stack, AI API*

- Built a specification-driven finance controller that automates payment reconciliation across multi-source financial chains, with AI exception investigation and full auditability.

EDUCATION

B.E., Computer Engineering – Dr. D. Y. Patil College of Engineering & Innovation, Talegaon (SPPU) *2025 – 2028 (Expected)*

Diploma in Computer Engineering – PCET's Pimpri Chinchwad Polytechnic, Pune (MSBTE) *2022 – 2025*

Class X: 94.60%, First Rank Holder – Model English School, Kalamb *2022*
