

Omkar Deshmukh

Software Engineer Intern Candidate | Full-Stack (MERN) & AI-Native Developer

Pune, India | +91 9764781298 | omkardeshmukh394@gmail.com | github.com/OmkarDeshmukh16 | linkedin.com/in/omkar-deshmukh-631992251

PROFESSIONAL SUMMARY

Computer Engineering student who ships real software: four internships and roles across ML, full-stack and software development, plus several deployed MERN applications. Builds backend services, REST APIs and React dashboards in Node.js and Python, and integrates LLM APIs into production products. Uses AI coding tools as a daily co-engineer to prototype fast, take feedback and turn it into working code. Seeking to contribute as a Software Engineer Intern.

TECHNICAL SKILLS

Languages & Fundamentals: Python, JavaScript, SQL, Data Structures & Algorithms, Object-Oriented Programming

Backend & APIs: Node.js, Express.js, REST APIs, MongoDB, Database Design, Role-Based Access Control

Frontend: React.js, HTML, CSS, Responsive Design, Dashboards

AI & Workflows: AI-Assisted Development, LLM Integration, Gemini API, Claude API, Prompt Engineering, AI Chatbots, Agentic Workflows

Tools: Git, GitHub, Vercel, Netlify

EXPERIENCE

Machine Learning Intern, FlyRank AI

Jul 2026 – Present

- Contribute to applied ML and AI initiatives within the engineering team, working on model integration and AI-driven product features.
- Support data handling and experimentation workflows that feed product-facing AI features.

Full Stack Developer, DYPCOE&I Incubation Center

Feb 2026 – Present

- Own frontend and backend development of MERN stack applications for incubation-center startups and initiatives.
- Work directly with mentors and founders, turning product requirements into deployed, working software.

Web Developer Intern, Unified Mentor

Jun 2025 – Sep 2025

- Developed and maintained responsive web applications with the MERN stack during a 3-month internship.
- Built reusable React components and REST API integrations that sped up delivery of later features.

Software Development Intern, Sagar Defence Engineering, Pune

Jun 2024 – Jul 2024

- Contributed to internal software development tasks in a 1.5-month paid internship using version-controlled team workflows.

PROJECTS

OBE Evaluation System (Outcome Based Education)

MERN Stack

Selected as Full stack engineer to build, at the DYPCOE&I Incubation Centre, an OBE system that faculty, HODs and the principal will use for CO-PO mapping and attainment calculation, which NBA and NAAC accreditation requires

MyFin AI – AI Finance Controller (Razorpay Buildathon)

MERN Stack, AI API

- Built a specification-driven finance controller that automates high-throughput payment reconciliation across multi-source financial chains, with AI-driven exception investigation and full auditability.

Shiksha Netra – School Management System (SaaS)

MERN Stack

- Developed a multi-tenant platform for student records, teacher data and fee management. Live: shikshanetra.netlify.app
- Automated Leaving Certificate and Bonafide letter generation, cutting manual administrative work for school staff.

Fitpulse – Gym Management System (SaaS)

MERN Stack, Grok API

- Built member records, memberships and a member portal with trainer-assigned workout and diet plans using a reusable template pattern. Live: fitpulse-zeta-five.vercel.app
- Implemented a client-side nutrition calculator with goal-based diet template matching; building an AI chatbot for instant plan guidance.

EDUCATION

B.E., Computer Engineering – Dr. D. Y. Patil College of Engineering & Innovation, Talegaon (SPPU)

2025 – 2028 (Expected)

Diploma in Computer Engineering – PCET's Pimpri Chinchwad Polytechnic, Pune (MSBTE)

2022 – 2025

Class X: 94.60%, District Rank Holder

2022
